As a long haul truck driver, I support XM Radio in it's new ventures into the traffic and weather areas. I really appreciate the Detroit channel, (216), as i frequently travel to Canada delivering goods, both food and retail household. XM provides me any delays or holdups, either on the freeway, or any sideroads, but most importantly, the Ambassador Bridge or the Blue Water. It saves me time and makes me more productive with my time, and helps keep me legal. Please do the right thing and tell the NAB to go shove this up their noses, as I am tired of listening to commericals, and constant chatter, all while not extracting any useful information.
